How to train with RIF4students

Three ways to train your spatial thinking – and what you need for each.

Choose your way in. All three options start at rif4students.eu.

Free | In your browser, no app | PC, tablet, smartphone | 1,700+ tasks | 10 areas | Ages 7 to 99 | DE & EN

OPTION 1
Practise on your own
For young people and adults

YOU NEED

Email address | Password

1. Sign up once
2. Complete your own profile
3. Get started in the Training Overview

You get: all 1,700+ tasks, saved progress, badges and “My results”. At any time, the account can be extended into a teacher/parent account by creating profiles (see Option 2).

OPTION 2
Practise with your class
For teachers and parents

YOU NEED

Email address | Password | Class list of names

1. Sign up once
2. Under “Profiles”, create class(es) and student profiles (individually or via Excel)
3. Print the code list or code cards and give each student their personal code card
4. Use individual practice in the Training Overview or activate the Test environment

Time needed: approx. 5–10 min each for creating the profiles and for the cards. Unlimited classes, which can be archived.

OPTION 3
Practise with a student code
For learners whose teacher or parent has set up a class

YOU NEED

Student code | no email | no password

1. Scan the QR code on your card or open rif4students.eu
2. On the home page, click “Log in with student code” and enter your code
3. Practise in the Training Overview or (if active) in the Test environment

You get: all tasks, progress, badges and “My results”. Forgotten your code? Your teacher can help.

The rule and the symbols in the Training Overview

THE GOLDEN RULE

Answer at least 80% correctly to unlock the next task group.

In each of the 10 areas, the first task group is unlocked right from the start. Each circle represents a task group of 20 to 60 tasks. The Training Overview is always available (except while the Test environment is temporarily activated for a class).

Blue outline
unlocked for you, ready to practise

Green
Mastered with at least 80%. The next task group is now unlocked.

Orange
Practised, but below 80%. Try again!

Light grey
Still locked

You can repeat blue, green and orange task groups at any time. Areas marked “(challenging)” are more demanding.

BADGES

🥇 🥉 🏆

In every area: a **Level Badge** for each task group mastered, **Area Pro** (3 task groups with at least 80%) and **Area GOAT** (all 6 task groups with at least 80%)

🚀 🔥 🎯 💎 👑

Across all areas (Overall Progress): Spatial Thinking Expert, **Tricky Tasks Expert**, **Spatial Thinking Guru**, **Tricky Tasks Guru** and, as the crowning achievement, **Spatial Thinking GOAT**

The 10 areas are based on the model of the “basic routines of spatial thinking”. Find out more at https://geometriedidaktik.at/ in the section “Räumliches Denken” (spatial thinking).

Two ways to train with classes

The Training Overview for individual practice is the default setting.
A teacher can activate the Test environment for their class for a set period of time.

Training Overview

Practise freely at your own pace.

- For everyone: individual learners, teachers and students
- always available
- Instant feedback: correct or incorrect
- With at least 80% correct answers, the next task group is unlocked
- Collect badges, view results online and as a PDF
- Teachers can set goals, e.g. “3 task groups in the Dynamics area by Friday”

Test environment

For assessing learning progress. The teacher selects 1 to 10 task groups and any end date (between 1 hour and 3 weeks ahead).

- Only when the teacher has activated a test for the class
- No feedback on whether answers are correct
- Tasks in random order
- During the test, the Training Overview, results and badges are hidden
- Only the teacher sees the results – per test or combined
- The teacher can extend or end the test at any time

Who can do what?

What is available to you with each of the three options.

Feature	1 · Individual learners	2 · Teachers	3 · Student code
Training Overview with all 1,700+ tasks	✓	✓	✓
Progress saved across all devices	✓	✓	✓
Badges and “My results” (PDF)	✓	✓	✓
Take part in a test	–	–	✓ if activated
Create multiple profiles (family)	✓ can be added	✓	–
Classes, code lists and code cards	✓ can be added	✓	–
Start, extend and end tests	✓ can be added	✓	–
Overall results for the class or family (PDF)	✓ can be added	✓	–

Get started at rif4students.eu

Choose your option: individual learner, teacher/parent or student code.

Not sure yet?
Then simply try out 20 of the 1,700+ tasks on **RIF4students** without signing up: open the home page and click “here”.

Enjoy practising and training with RIF4students.
